7.2 Products

Yo!Kart V9 is a catalog based system, this means that there is a catalog of products that the admin has predefined in the system. A seller can use these predefined products to set up their shop inventory.

NB: The admin can restrict the seller from adding new products. If so, the seller will only be able to view the products added by the admin and can only add inventory for the same.

Important Terminologies: It is important for the seller to understand a few terminologies before proceeding further with adding products. Understanding these terms will make it easy for the seller to navigate the 'Products' section.

NB: Nota Bene [Note Well] (N.B., N.b., n.b or NB, Nb, nb) is a Latin phrase, meaning "note well" or "take notice" or "please note". Asterisk (*) next to a form control's label indicates it as "required".

Depending upon who added them in the system, the products available on website can be categorized among two categories:

- i. **Marketplace Products:** These are the products that are added by the admin. The sellers can view these products but cannot make any kinds of changes.
- ii. **Private Products:** These products are added by the seller itself. The products added by any seller will be shown only to that respective seller and only they can make changes in them.

There are two different types of products available on website:

- a. **Physical:** These are the products that are tangible and can be shipped to the customers. For example clothes and electronic gadgets are physical products.
- b. **Digital:** These are the products that are intangible but can be accessed online or as soft copies. For example, e-books and internet television channels are digital products. Such products cannot be shipped.

Seller Shipping: The seller has the choice of activating and deactivating the shipping option for any product added on the system. The products that are added by the admin can also be shipped by the seller by activating the 'Seller Shipping' option for those products. Each product displays its own 'Seller Shipping' option. The shipping options seen by any seller are:

- **N/A:** This option is available for products that do not require any shipping. All the digital products do not require any shipping. So, if any digital product is added by the admin or by the seller, it will display 'n/a' under the 'seller shipping' column. Additionally, any products added by the seller itself, will also

display 'n/a' in the shipping section since it is presumed that the product added by the seller will be shipped by the seller only.

- **Seller Shipping Deactivated**  : The grey toggle switch button displayed ahead of any product depicts that the shipping for that product has been deactivated by the seller.
- **Seller Shipping Activated**  : The green toggle switch button displayed to the right of any product depicts that the shipping for that product has been activated by the seller. The '[Edit Shipping](#)' icon is displayed to the right of products for which the seller has activated shipping.

This module includes three tabs that are explained below.

i. [Marketplace Products](#)

This tab displays all the catalog products available in the system along with any seller defined custom products. The list displayed on this page includes products added by the seller as well as those added by the admin. Please note that the seller will not be able to view products of other sellers. When a newly registered seller visits this page they will either see no products or the products that are added by the admin.

NB: The seller can choose to ship the Marketplace products (products added by the admin) displayed in the list. The "[Add Inventory](#)" and "[Product Info](#)" action buttons are available to the extreme right of these products.

NB: Nota Bene [Note Well] (N.B., N.b., n.b or NB, Nb, nb) is a Latin phrase, meaning "note well" or "take notice" or "please note".
