Single-Vendor Shopify Plugin Keys Setup Guide

Yo!Kart provides the feature of **importing products** from the Shopify platform.

This guide covers configuration settings for **users** who have been using the **single vendor** shopify account.

To configure the plugin, please log into the seller panel and then go to Seller Panel > **Plugins > Data Migration > Edit**.

Shopify Settings	×
Shopify single vendor plugin info Please visit https://{storename}.myshopify.com/admin/apps/private to crea app	ote
Shop URL*	
Password*	
Note: need product read access to fetch products	

To fetch keys required to import the data from an existing multi-vendor Shopify account, please follow the below steps -

Step 1 Login into your Shopify Store

1. Visit

https://accounts.shopify.com/lookup?rid=094055e0-a977-4d81-ab85-75a0552fc <u>7fe</u> and Log into your **Shopify** account using your credentials. 2. Once logged in, you will be redirected to the dashboard. Please copy the shop URL from the web browser. It is provided in the format-

\leftrightarrow \rightarrow C 🗎 car	I11122.myshopify.com, admin
🗿 shopify	
A Home	
Orders	
Products	
Customers	
III Analytics	
🚱 Marketing	
Ø Discounts	
Sales channels	>
nline Store	
Apps	>

Your_shop_name.myshopify.com

Paste this url in the settings provided on Yo!Kart's Seller Panel > Plugins > Data Migration > **Edit > Shop URL.**

Step 2 Create An App

 Go to Settings > select Apps and Sales Channels from left navigation menu options and click on the Develop apps button located at the right hand corner.

🔅 Settings		
carol11122 carol11122.myshopify.com	Apps and sales channels	Develop apps Customize your store
Store details	Showing 2 apps and sales channels	Sort by Name (A–Z) \$
Billing	Advanced Cash on Delivery Online Store - Sales channel	Get support Remove > Remove >
Users and permissions	Build custom apps for your unique needs	
Checkout	Develop custom apps to integrate data or build a custom storefront. Develop apps for your store Learn more	
Taxes and duties	Learn more about apps	
Gift cards		
Markets Apps and sales channels		

2. Next, click on the **Allow custom app development button** to activate the custom app development facility. Follow the other prompts you may receive and select custom app development. You will be notified with a prompt message.

←	App development
	Start developing apps on your store
	Develop your own apps to integrate your store's data with external services or build custom storefronts.
	App development should only be done by trusted developers on your team. Apps can give API access to your data, and that data can be accessed outside of Shopify.
	All apps are subject to the Shopify API License and Terms of Use.
	Allow custom app development

3. Click on the **Create An App** button prompted on the App Development window.

4. Enter **App Name** and click on the **Create App** button to confirm.

Create an app	×
App name	
Test	
App developer	
carol merchant (merchantcarol2@gmail.com)	\$
Can only be assigned to staff and collaborators with permission to develop apps. We'll contact them about development updates, like changes to Shopify APIs.	
Apps are subject to the Shopify API License and Terms of Use.	
Cancel	app

Step 3 Admin API Integration

From the App Development overview tab, click on the Configure Admin API scopes button.

pp develo	pment > Tes	t
Overview	Configuration	API credentials App settings
Select your	access scopes to	get started ata Develop unique shopping
Configure	Admin API scopes	Configure Storefront API scopes

 Next, add Filter Access Scopes using the search filters. Type **Products** in the search box and select the checkbox **read_products** and finally click on the **Save** button. **Configuration Saved** message is displayed to confirm the successful configuration.

App development > Test	Install app
Overview Configuration API credentials App settings	
Configuration > Admin API integration	Cancel
Admin API access scopes All Selected	Get access to store data with the <u>Admin API</u> . Only select the scopes your app needs. Don't access APIs in ways that violate the <u>Shopify API License</u> and Terms of Use.
Q products	Explore Admin API scopes
Products View or manage products, variants, and collections write_products read_products	Image: Start using the Admin API Image: Start usi

Step 4 Install App

 Click on the Install App that activates when you clicked on the Save button in the previous step.

App development > Test	Install app
Overview Configuration API credentials App settings Configuration > Admin API integration	
Admin API access scopes AII Selected 1	Get access to store data with the <u>Admin API</u> . Only select the scopes your app needs. Don't access APIs in ways that violate the <u>Shopify API License</u> and <u>Dems of Use</u>
Q products	Explore Admin API scopes
Products View or manage products, variants, and collections read_products	Start using the Admin API Image: start using the

2. Follow the prompts and click on **Install** button to confirm app installation.

Install Test on carol11122?	×
Installing gives this app access to your data. You'll get an access token that's limited to API scopes you selected. Make sure you've only selected scopes that your app needs to This app is subject to the <u>Shopify API License and Terms of Use</u> .	the o work.
Cancel	Install

3. Next on the **API credentials** tab you view API Access token key.

App development > Test Installed				
Overview	Configuration	API credentials	App settings	
PI credential	s			
Admin API	access token Nev	N		
Use your acc	ess token to request o	data from the <u>Admin</u>	API.
